Neutrophils in Infectious Diseases

www.benthamscience.com/ebooks/9781608050239

About the eBook

Neutrophils are key components of the inflammatory response, and are shown to have immunoregulatory roles in microbial infections. This e-book provides an overview of the recent advances made in the field of neutrophil biology and motions towards some of the exciting new directions in which neutrophil research is moving.

Contents

- Neutrophils and Extracellular Traps in Microbial Infections
- Imaging Neutrophil-Pathogen Interactions in vivo
- Neutrophils in the Context of Polymicrobial Sepsis
- Neutrophils in Mycobacterial Infections
- Role of Neutrophils in the Early Shaping of the Leishmania major Specific Immune Response in Experimental Murine Cutaneous Leish
- Understanding Neutrophil Function During Toxoplasma gondii Infection
- Neutrophils as Potential Safe Niche for Leishmania and Anaplasma
