Frontiers in Drug Design and Discovery, Volume (4)

www.ebooks.benthamscience.com/book/9781608052028

About the eBook

This eBook series is devoted to publishing the latest advances contributed by eminent researchers in drug design and discovery.

Contents

- Editorial: Biopharmaceutical & Pharmacokinetic Considerations in Drug Design & Discovery
- Present and Future Mass Spectrometry-Based Approaches for Exploratory Drug Metabolism and Pharmacokinetic Studies
- Small Molecule Drug Targeting of RNA
- Glutathione Transferases in Drug Discovery and Development: Towards Safer and Efficacious Drugs
- New Sampling Techniques for Pharmacokinetic-Pharmacodynamic Modeling
- Role of Inflammatory Biomarkers in Establishing PK/PD Relationships and Target Organ Toxicity
- Important Drug Interactions for Clinical Oncologists
- Pharmacogenomic Considerations in Breast Cancer Management
