About the eBook

This volume integrates new and old information about the molecular mechanisms, histopathological and electrophysiological alterations for diagnosing treating septic cardiomyopathy. It attempts to bridge the gap between basic and clinical scientists while presenting new data on different aspects of cardiac physiology during septic cardiomyopathy in a single volume.

...addresses the various aspects of Sepsis processes in a single volume by authors who are leaders in this field.

Foreword by Michael R. Pinsky,
University of Pittsburgh Medical Center, Pittsburgh

Contents

- Potential Pathophysiological Mechanisms in Septic Cardiomyopathy: an Overview
- Cellular and Molecular Mechanisms of Septic Cardiomyopathy
- Cellular Electrophysiological Mechanisms in Septic Cardiomyopathy
- Septic Cardiomyopathy: A Distinct Histopathological Entity
- Septic Cardiomyopathy: A Distinct Metabolic and Genetic Entity?
- Clinical and Molecular Aspect of Septic Cardiomyopathy: Basic Concepts
- The Clinical Aspects of Septic Myocardiology
- Septic Cardiomyopathy: an Echocardiographic Approach
- Which Biomarkers Can I Use to Manage Septic Cardiomyopathy
- Current and New Therapeutic Interventions in Septic Cardiomyopathy
