NBE is the official journal of the Institute of Complex Medical Engineering (ICME). The journal promotes the best interdisciplinary research in neuroscience and biomedical engineering. NBE welcomes contributions in any domain of neural and biomedical engineering ranging in content from practical/clinical applications through experimental science, technological developments to quantitative and/or statistical methodology discussions. NBE publishes the following article types: original articles, research reviews, and book reviews.

Core topics include, but certainly are not limited to, the following:
- Neural Technology and Neural Rehabilitation
- Neurology and Signal Processing
- Biomedical Informatics
- Biomechanics and Neural Control
- Theoretical and Computational Neuroscience
- Imaging Neuroscience
