

Tentative Outline (Preliminary Proposal of Thematic Issue)

Special/Thematic Issue for the journal "Letters in Drug Design & Discovery (LDDD)"

Title: Innovative strategies for designing new antimicrobial agents

Guest Editor: Marvin Soriano-Ursua

Scope of the Thematic Issue:

The XXI century is a time for expanding knowledge regarding interaction with the microbial environment. In this sense, human diseases attract the attention of researchers for limiting the noxious action of microbial agents linked to pathologic processes. In this issue, researchers present innovative strategies to develop therapeutic agents considering the microbial organisms involved in human diseases as a target.

Keywords: Antimicrobial; Antibacterial; Bioinorganic chemistry; Immunology; Infectious diseases

Sub-topics:

- Antifungal
- Antibacterial
- Immunology in infectious diseases
- Novel antimicrobial

Schedule:

✧ Complete Thematic issue submission deadline: **September 30, 2022**

Details of Guest Editors:

Name: Dr. Marvin Soriano-Ursua

Affiliation: Department of Physiology. PLAN DE SAN LUIS Y DIAZ MIRON, S/N. COL. CASCO DE STO. TOMAS, DEL. MIGUEL HIDALGO, ZIP 11340. MEXICO CITY, MEXICO
