Preface

The inaugural issue of the journal Current Chinese Computer Science (CCCS) has been completed as its first issue. We begin the New Year with Volume 1 of Current Chinese Computer Science. We hope that you will find the published manuscripts in this issue of high quality and interest and beneficial to your research programs.

The journal offers a range of article formats, including research articles, reviews, communications, editorial letters, and so on, we will be adding perspectives. All of these articles are peer-reviewed by members of the editorial board, including guest editors, as well as additional expert reviewers. I would personally like to take this opportunity to thank everyone who has volunteered their time to review various articles that we have received over the past year. I would also like to thank the editorial staff at Bentham Science and, particularly, Ms. Rida Rahman, for their expert assistance in making Current Chinese Computer Science successful.

We look forward to your continued contributions of both manuscripts and the review of manuscripts to continue building Current Chinese Computer Science. The past year has been a difficult one for many, given the global COVID-19 pandemic, and we begin 2021 with optimism that new therapeutics and vaccines will hopefully improve this situation. We hope that 2021 will be a healthy and successful year for everyone.

The journal is gaining pace, and so is its reputation amongst researchers, which will ultimately lead to the continued future success of Current Chinese Computer Science.
