Preface

The journal “Current Organic Chemistry” (COC), with 24 volumes published in the past year, has entered into its 25th year. COC grew to a leading international journal publishing in-depth reviews on exciting fields and, starting in the last few years, selected research articles on hot topics. It is noted that indeed only cutting-edge original papers are considered. The topics of the articles may embrace all fields of organic chemistry, bioorganic chemistry, natural product chemistry, heterocyclic chemistry, organo-metallic chemistry, heteroatom chemistry, selective and asymmetric syntheses, catalytic and green chemistry, microwave chemistry, ionic liquids, flow chemistry, suitable aspects of medicinal chemistry and polymer chemistry, as well as analytical methods in organic chemistry. Review articles must comprise at least 100 references. Proposals for guest-edited special issues are also awaited according to the scope mentioned above. Hot topic issues should include mainly review articles and a few original papers. Manuscripts on classical heterocyclic chemistry or material science are not considered. Regarding original papers, the Supplementary Information may contain additional supporting data and illustrations. Before submission, authors are asked to study the “Authors Guidelines”. The photos of the senior authors will continue to be included in the articles.

The journal receives support from a team of eminent Associate Editors, Regional Editors, and Editorial Advisory Board Members, who do their best to promote this vehicle. I would also like to thank the founder Editor-in-Chief Professor Dr. Atta-ur-Rahman, the Editorial staff of Bentham Science Publishers (Mr. Mahmood Alam, Mr. Qasit O. Malik, Mrs. Nuzhat Gul, Ms. Sanob Maqbool, and Ms. Ayesha K. Bakhtawar) for their noble efforts and dedication in the publication process of the journal.

Prof. Dr. György Keglevich
Editor-in-Chief
