**Prof. Giulio Rastelli**
Department of Life Sciences
University of Modena and Reggio Emilia
Modena
Italy

Prof. Giulio Rastelli is Associate Professor in Medicinal Chemistry and Head of the Molecular Modeling & Drug Design laboratory (www.mmddlab.unimore.it) of the University of Modena and Reggio Emilia, Italy. He received his PhD in medicinal chemistry from the University of Modena and Reggio Emilia, and has been research fellow at the University of California San Francisco under the direction of Prof. Peter Kollman and Dr. Daniel Santi. He has been a visiting scientist and collaborator of Kosan Biosciences for several years. His research interests focus on the development and application of computational drug design methodologies to address problems that lie at the interface between chemistry, biology and medicine.

He has been coordinator of several grants from Italian Association of Cancer Research, EU, MIUR, Regione Emilia Romagna, Spinner, Foundations and pharma companies. He collaborates with several academic and private institutions for the discovery and development of small-molecule inhibitors of relevant drug targets, with a special focus on cancer. He is member of the F1000 Faculty in the “Drug Discovery & Design” section.
