Meet Our Editorial Board Member

Dr. Annalena Venneri
University of Sheffield
Sheffield, S10 2RX
UK

Annalena Venneri is a Professor of Clinical Neuropsychology at the University of Sheffield and Honorary Consultant at Sheffield Teaching Hospital NHS Foundation Trust. Since 2014, she is also the Scientific Director of the IRCCS Fondazione Ospedale San Camillo, a neurorehabilitation research hospital in Venice, Italy. Her research interests lie in early and differential diagnosis of dementia, in the evaluation of both pharmacological and non-pharmacological treatments of Alzheimer’s disease with neuroimaging techniques, and in clarifying the premorbid biological, personality and cognitive mechanisms underlying psychotic symptoms in neurodegenerative diseases. She is also interested in prevention of cognitive decline and how modifiable lifestyle factors may influence the risk of developing cognitive decline later in life. Professor Venneri has been extensively involved in the study of functional connectivity and how alterations of connectivity may be predictive of cognitive decline, using machine learning algorithms. She is a member of the editorial board of several neuroscience journals. She has extensively published a number of high impact factor neuropsychology, neurology and neuroscience journals.
