Ms. Rabia Moin: A Linchpin in the Road to Success of *Current Neuropharmacology*

We are proud that the impact factor of *Current Neuropharmacology* has nearly doubled in the last 5 years and is continuing to rise, attracting more distinguished scientists to publish in the journal. The key to the success of the journal has been one critical element: Ms. Rabia Moin. Rabia has been a Senior Publication Manager for the past decade, acting as the face of the journal and the primary support for the Editor-in-Chief and the Editorial Board. Her professional skills, dedication to her work, and kindness and patience when dealing with the triad of authors, reviewers and editors are unique. We interact with Ms. Moin on a daily basis, and she does anything and everything needed to facilitate the work of the Editorial Board and speed up the publication of articles, always in full conformity with a rigorous and transparent review process. In short, Rabia is the jewel in the crown of the journal. This short Editorial in no way minimizes the highly qualified work of other members of the Bentham team. It is just an opportunity to express our full gratitude for Ms. Moin's enormous contributions to *Current Neuropharmacology*.
