Recent Patents on Telecommunications

www.benthamscience.com/rptelc

Aims & Scope

Recent Patents on Telecommunications publishes review and research articles by experts on recent patents in telecommunications. The journal also covers recent research (where patents have been registered) in fast emerging areas of the field such as networks, wireless communications, communication technology, computing and processing, and the Internet. A selection of important and recent patents on telecommunications is also included in the journal. The journal is essential reading for all researchers involved in telecommunication science and technology.
